PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Power BI, Advanced Excel and Python, with skills in data cleaning, transformation, analysis, visualization, dashboard development, and data validation. Experienced in using data to identify trends, patterns, and insights that support business decisions. Currently advancing Data Analytics skills through Entri with practical projects and hands-on learning. Strong analytical and problem-solving skills, with 8 years of professional experience in GIS and data management at Cyient. Seeking a Data Analyst role to apply analytical, visualization, and reporting skills to support data-driven business decisions.

TECHNICAL SKILLS

Data Analytics & Business Intelligence : Power BI, Power Query, DAX, KPI Reporting, Dashboard Development, Data Validation, Exploratory Data Analysis (EDA), Data Quality Checks, Business Insights.

Advanced Excel: Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting, Charts, Data Modeling, Formula Creation, Data Cleaning.

Programming & Query Languages: SQL (MySQL), Basic SQL Queries, Joins, Data Extraction, Data Transformation, ETL, Python (Basic)

GIS Tools: ArcMap, QGIS, FME Workbench

Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Time Management, Adaptability, Decision Making

PROJECTS

E-Commerce Sales & Order Analysis | Power BI

- Performed data cleaning and transformation using Power Query to prepare sales and order data for analysis.
- Created DAX measures and KPIs to analyze sales performance, orders, customer ratings, and delivery efficiency.
- Developed an interactive Power BI dashboard to analyze order trends, regional performance, product categories, customer ratings, and delivery time.
- Identified key insights such as top-performing states and categories, discount impact on sales, and opportunities to improve customer satisfaction and low-performing categories.

Healthcare Data Analysis & Insights | Excel

- Cleaned and transformed healthcare data by handling missing values, inconsistencies, dates, and categorical data.
- Created Weight Status, Diabetes Status, and Age columns for patient-level analysis.
- Combined multiple tables using Customer ID and VLOOKUP, and analyzed data using Pivot Tables.
- Created an interactive Excel dashboard with charts and slicers to analyze healthcare charges, patient health trends, and key insights.

EXPERIENCE

GIS Analyst | Cyient Limited

Jan 2018 – Present

- Processed Administrative and Non-Administrative Area data, including country, state, district, city, village, neighborhood, and postal areas.
- Performed boundary validation, topology cleanup, and geometry checks to identify and resolve overlaps, gaps, spikes, and invalid geometries.
- Maintained attribute tables, ISO codes, and multilingual location data to support accurate geospatial indexing and search functionality.
- Conducted before-and-after validation checks to ensure data accuracy, consistency, and quality.
